

# Unilever

## Coalition member since 2020 | As of September 2024, palm oil, soy, and paper, pulp, and fibre-based packaging (PPP) are material commodities for Unilever.

The following table includes a list of each Key Performance Indicator (KPI) for each material commodity, along with the company's 2023 reporting record. The record includes the following responses:

- “Yes” indicates a company is reporting against a KPI and reporting quantitatively where indicated
- “Yes – narrative reporting” indicates a company is reporting qualitatively against a quantitative KPI
- “Not yet reporting” response indicates a company is not yet reporting on a KPI
- “N/A” indicates a KPI was not established in a given year

Companies have also provided information on their performance against appropriate KPIs, along with methodologies and targets. This information has been self-reported by companies and verified by Proforest.

Links are provided to information when a company is reporting (“Yes”) against a public information requirement, and when a company is reporting qualitatively (“Yes – narrative reporting”) against a quantitative KPI.

2.4 - Performance of engaged suppliers and changes over time including progress on delivery across entire business	<p>Our progress towards our deforestation-free supply chain in paper and board target by 2023 increased from 91.2% in 2021 to 95.58% in 2022.</p> <p>On supplier engagement: These efforts are the main reason why we have been able to continue to increase the volume of third-party certified material, from 79% in 2017 to 95.58% in 2022. Our suppliers self-assess their performance on a quarterly basis reporting via the GTS system, which we developed for this purpose. Annually, we engage SGS to verify the information reported. Each supplier reporting via GTS receives a "Supplier Sustainability Summary" report that summarises the overall sustainable sourcing percentage achieved by the supplier based on data provided.
